

Safe People Registry | Quick start guide for organisations

To register your organisation on the Safe People Registry, please complete the following steps.

1: Identify a Senior Responsible Officer (SRO)

- This is typically someone in a senior or accountable role (e.g. Head of Department/ College, Director, or HR lead)
- The SRO will create and own the organisation's account
- They can invite delegates to help manage the account day-to-day

2: Share this information with the SRO

- If you are not the right person to act as SRO:
 - Please share this information with the relevant individual
 - We recommend using a shared or role-based email address such as "headofdepartment@domain.org", to enable continuity of the account over time

3: Complete the SRO declaration

- The SRO declaration, which can be found at https://safepeopleregistry.org/Registry_SRO_Declaration.pdf, must be reviewed and signed by an authorised legal representative
- The declaration formally authorises the SRO to act on behalf of the organisation

4: Create the account

- The SRO can then create the organisation account & upload the SRO declaration at <https://safepeopleregistry.org/>
- Delegates can be added to support account management
- The HDR UK account administrator can then approve your full access to the system.

What happens next?

Once your account is setup and approved, you can:

- Affiliate staff and students with your organisation
- Enable researchers/innovators to reuse their information across multiple data custodians
- Speed up validation processes for accessing sensitive data for research
- View a project register showing sensitive data projects involving your organisation

Need help?

If you have any questions or need support during setup:
